PROFESSIONAL SUMMARY

Results-driven entry-level Data Analyst with hands-on experience in end-to-end data workflows — from cleaning and transformation to dashboard creation and stakeholder reporting. Proficient in Python (Pandas), MySQL, Microsoft Excel, and Power BI, with a strong foundation in exploratory data analysis, data visualization, and insight generation. Trained and mentored 60+ learners in data analytics, demonstrating the ability to communicate complex findings to both technical and non-technical audiences. Passionate about leveraging data to drive informed, evidence-based decisions.

TECHNICAL SKILLS

Data Analysis	Python (Pandas, NumPy), Microsoft Excel, Pivot Tables, Google Sheets
Databases	MySQL, SQL querying, relational database design
Visualization	Power BI, DAX measures, Excel Dashboards, Matplotlib, Seaborn
Data Cleaning	Data wrangling, missing value treatment, outlier detection, normalization
EDA & Statistics	Exploratory data analysis, descriptive statistics, hypothesis testing
Reporting	Stakeholder reports, automated Excel templates, PDF documentation
Web Development	HTML, CSS, JavaScript (basics)
Other Tools	Adobe Photoshop, Adobe Premiere Pro, Pinnacle Studio, Lightroom

DATA ANALYTICS PROJECTS

Sales Performance Analysis | *Python, Pandas, Excel, Matplotlib*

- Analyzed 12 months of retail transaction data (10,000+ rows), identifying 3 top-performing product categories accounting for 62% of total revenue.
- Designed an interactive Excel dashboard with slicers and Pivot Charts, reducing manual monthly reporting time by an estimated 40%.
- Identified seasonal demand peaks in Q3 and Q4, providing actionable recommendations that informed restocking decisions.

Customer Segmentation Model | *Python, K-Means Clustering, Power BI*

- Applied K-Means clustering to segment 5,000+ customers into 5 behavioural groups based on recency, frequency, and monetary (RFM) metrics.
- Built a Power BI dashboard visualizing customer distribution across segments, enabling targeted marketing strategy for each cohort.
- Provided segment-level insight reports that outlined retention risk factors and upsell opportunities for each customer group.

Financial KPI Dashboard | *Power BI, DAX, Excel*

- Designed a multi-page Power BI dashboard tracking 8 core financial KPIs — including revenue growth, cost-to-income ratio, and net profit margin — using advanced DAX measures.

- ▶ Implemented drill-through pages enabling stakeholders to explore department-level performance in under 3 clicks.
- ▶ Reduced time-to-insight for monthly finance reviews from 2 hours to under 20 minutes.

COVID-19 Global Data Analysis | *Python, Pandas, Matplotlib, SQL*

- ▶ Cleaned and merged multiple WHO datasets (500,000+ rows) using Python and SQL, resolving 15%+ missing-value rates through imputation and filtering logic.
- ▶ Performed exploratory data analysis (EDA) to compare infection rates, recovery trends, and mortality across 50+ countries over a 24-month period.
- ▶ Produced 10+ publication-quality visualizations illustrating epidemic curves, vaccination uptake, and regional disparities.

Student Academic Records Database | *MySQL, Excel*

- ▶ Designed and maintained a relational MySQL database to manage academic records for 300+ students across multiple terms.
- ▶ Automated result upload and grade computation workflows, eliminating manual data entry errors and cutting reporting time by 50%.
- ▶ Generated structured academic performance reports that supported timely communication between school management and parents.

WORK EXPERIENCE

Data Analyst & Instructor | *Digital Dreams ICT Academy*

Jan 2024 – Present

- ▶ Developed and delivered structured data analytics curricula to 100+ learners across online and in-person training cohorts, covering Python, SQL, Excel, and Power BI.
- ▶ Designed and maintained instructional dashboards and datasets used in live demonstrations, ensuring accuracy and pedagogical clarity.
- ▶ Created and edited over 20 hours of video training content on data analysis workflows, deployed across digital learning platforms.
- ▶ Assessed student projects, providing data-driven feedback that improved learner performance scores by an average of 30% between cohort intakes.
- ▶ Collaborated with curriculum leads to continuously update training materials aligned with current industry tools and practices.

Computer Studies & Data Processing Tutor | *Intellectual Giants' Christian Academy*

Sep 2019 – Aug 2022

- ▶ Designed lesson plans and delivered Computer Studies and Data Processing instruction to 200+ secondary students annually.
- ▶ Built and managed a MySQL database for student academic records, reducing data retrieval time by approximately 60% compared to manual filing.
- ▶ Developed automated Excel templates for processing and uploading student results to the school portal, eliminating manual errors across 3 terms per year.
- ▶ Generated term-by-term academic performance reports used by school management to identify at-risk students and allocate academic support resources.

EDUCATION

Postgraduate Diploma in Education (PGDE) — Educational Foundations

2022

Nnamdi Azikiwe University, Awka

B.Sc. (Hons) Biochemistry — Second Class Upper

2014

Michael Okpara University of Agriculture, Umudike

CERTIFICATIONS

- Technical Support Fundamentals — Google / Coursera (2024)
- Diploma in Data Analysis & Front-End Web Development — Digital Dreams ICT Academy (2022)
- National Youth Service Corps (NYSC) — 2015
- Industrial Training — National Root Crops Research Institute (2012)
- NSBMB Scientific Conference — 2012
- Peacebuilding Capacity Training Workshop — 2011

TOOLS & TECHNOLOGIES

Data Analysis

Python (Pandas, NumPy), Excel, Google Sheets

Databases

MySQL, SQL querying, relational schemas

Visualisation

Power BI, DAX, Excel Dashboards, Matplotlib

Data Cleaning

Pandas, Excel Power Query

Reporting

Power BI Reports, Excel, PDF Generation

Other

Adobe Photoshop, Premiere Pro, HTML/CSS/JS
